## Professional Experience and Curriculum Vitae

I listen more than I should speak and thus the very reason on me always finding rhythmic compositions through photography. I enjoy hands-on creation and designing.

The solace I seek with tactile surfaces and believing there is only one light and that is the sun. I believe in the right moment, where the light shines on a subject falling precisely where it should be.

These are the very reasons why I am much more interested with spaces and materials, even the unpleasant sight of rubbish dumps, as I see an "emotion" exuding. It is a portrait so to say. Portraits of structures, where the viewer decides their concern to which the photograph displays.

You'll never know how far you've walked not till you turn back only to realize it's too late. Therefore as everyone seeks to keep on chasing materials, I would like to take a stroll, as there is "something in nothing", before it all turns into blocks of concrete.

## Previous Clientele
