Professional Experience and Curriculum Vitae

SF, fantasy and horror are the major themes featured in my artwork across a variety of mediums, blending traditional methods with digital jiggery-pokery.

Based in London, I have produced covers and illustrations for books, graphic novels and magazines in the UK and north America. Recently, I have also developed abstract work for private collectors.

My primary area of interest however is in creating dynamic science fiction and fantasy art for magazines and comic books.

I am available for commissioned pieces and contract work so feel free to contact me.
