Professional Experience and Curriculum Vitae

I am a photographer & visual artist because I want to create something special, something people can relate and feel. Telling stories visually is my strength. In the digital era, the most impressive stories will be told in pictures.

Well this is me. Digital artist, photographer, retoucher from Finland. Portrait photographer of Finland 2013. Internationally awarded commercial photographer. Father and a husband.

My mission is to build the visual experience, which tells the story of you, your product, service or company, in a globally understandable way. I belong to a new generation of image artisans, to whom all things are possible. I create complex visual concepts and images with unlimited imagination. Imagine Anything.

I operate through international network of professional resources. For me, every picture is a unique project.

Available to work world wide.
