SPIRAL

This is the base of a center table, a glass and mirror would be slicing through the highest panel to make the top of the table. The carved spiral engraving on these panels represent continuity and progression.

CONSOLE - HARMONY

Harmony is inspired by the classic, victorian, renaissance era and the development of this type of craftsmanship in Karachi, Pakistan.

The top semi circle of this console is in perfect harmony with the bottom two semi circles which represent balance and progression.

Shisham wood is being used to design the form of Harmony and oak plywood is used for the top layer. This console would brighten the front entrance of any home, office and institutions looking to promote thier orgnization. This console is in it's most natural form, without polish or finishes.

Wood Works

Wood can be used in various ways using different techniques to build implements and decorative objects. A few products and methods are displayed here. A box made out of one piece of wood, a slingshot using a specific part of a tree to make it a reliable implement, wooden vases using the lay, wooden whittlings and a storage unit build out of using plywood.

Heineken Lamp

This lamp is built by recycling used Heineken cans. Triangles and square shapes have been cut through these cans for the light source to penetrate to the surrounding areas. This lamp holds itself together through the method of fastening metal wires.

T Lights

The concept is driven from transparency and the buildings of a city. These are made of stainless steel and getting the dried wax off the T light holders would not be an issue. These give off enough light that another form of lamp or light source is not required, in a room. Nothings better then these T lights to light your dinner tables.
