Professional Experience and Curriculum Vitae

My name is José Ramos and I'm a nature/landscape photographer, among other things.

I've developed an increasing interest in photography over the last years, and the passion grew so strong that this is the art I've chosen to express myself, as well as pay homage to the beauty and power of the world which surrounds us.

It all began with some simple nature snapshots, and evolved to a vicious circle of taking and sharing photos, as well as working commercially in commissioned photography works. Lately I've started working with music bands, fusing my photography with the musician's presence, and it has been very exciting.

In the end, what matters to me is to be able to depict and create my own interpretation of what surrounds us, sharing my vision in the form of photography.
