It's time a charity receives
something even bigger than it gives.

Charities make a huge contribution to the quality of life in the Twin Cities. It won't be easy to match their efforts, but we're going to try by contributing a full page of advertising space each month for use by a local charity, selected by our readers. A full page ad covers a little less than two square feet, multiplied by more than a million readers comes out to an area of about 44 acres. To nominate a charity for future consideration or to cast your vote, visit startribune.com/44acreproject.

Big fish.
Deep pond.

McKinley Group makes the most placements from the deepest pool of talent.

As Minnesota's top executive search firm, we can help your organization thrive by finding the talent you need when you need it. Combined, our leadership team has 150 years of recruiting experience, and in 2009 we interviewed 3,000 candidates, more than any other search firm. Our success with our corporate clients has helped us, too: McKinley Group has made several appearances on the Business Journal Fast 50 and the INC. 5000 lists of fastest-growing private companies. In the Land of 10,000 Lakes, that makes McKinley Group the one to catch.

Premier Mounts puts tool-free fine tuning right at your fingertips.

Quick Release Base
Projector quickly disengages for maintenance, then quickly re-mounts with no need for realignment.

Adjustable Leveling Barrels
Quickly level mounting legs without any specialized tools.

Fine-Tune Controls
Precise, tool-free control of roll: $\pm 4^\circ$, pitch: $\pm 5^\circ$ and yaw: $\pm 20^\circ$.

Mounting Legs
Both long and short mounting legs are included to reach more projector mounting points.

Lock-It Security Hardware
Specialized hardware to be used at critical mounting points to protect projector.

It's time to re-adjust your thinking about projector mounts.

Using a screwdriver to adjust projector settings can be a real pain in the neck. Premier Mounts' new, easy-to-use universal Fine Tune Projector Mount (FTP) lets you fine tune yaw, pitch and roll settings with just your fingertips. When the adjustments are made, they can then be locked down from one securing point so the settings stay in place, even if the projector and detachable base are removed.

See and feel the FTP difference for yourself!
Call 800-368-9700 to schedule a demonstration.

See the FTP and dozens of other new mounting innovations in our expanded 200+ page catalog.

Xstatic fibers are cleverly knit into our award-winning socks to eliminate odor. The naturally anti-microbial benefits of silver fibers are activated by moisture to enhance the performance of these socks. After a run, your feet (and your nose) will notice the difference.

XStatic is a registered trademark of Noble Fiber Technologies, Inc.
