Professional Experience and Curriculum Vitae

To me, creative work is about bringing something new and wonderful into the world that wasn't there before. Life's hard; let's stay joyful.

I love the digital workflow for its flexibility, but in this era of special effects, I strive to keep a painterly look to my images. Computers don't make art by themselves, any more than oil paints do. It's the human mind and human hand—and a bit of magic—that make images that can make a viewer laugh, excite them, or inspire them.

So if you need a bit of magic for your next project, drop me a line.
