## Professional Experience and Curriculum Vitae

Matteo Gerbi is an Italian architect with extensive experience developed during his nine years working across various European countries. In 2011, he founded Matteo Gerbi Limited, a multidisciplinary design studio, with a clear vision of developing innovative, unique and cutting edge design. His work encompasses small to medium architectural projects, interior design, product design and art installation. Matteo Gerbi Limited often acts on behalf of the designer himself, as with his recent product design of RayShelf, a contemporary shelving system, but also actively seeks collaborative ventures with manufacturers eager to realise new product design in the furniture and lighting industries, as well as developers with a passion for innovative design solutions. Matteo Gerbi Limited is an ambitious business; its passion for design provides a powerful motivation which, coupled with its focus, patience and consistency, assures the provision of inimitable design and an unparalleled quality of service. Matteo Gerbi Limited has bags of curiosity and a huge capacity for creative thinking unfettered by predetermined style. This allows them to produce innovative designs that meet clients' aspirations, whilst staying within time and budget constraints. Matteo Gerbi Limited can offer the numerous skills and sensibilities developed by Matteo Gerbi during his extensive experience in the field of architecture. A knowledge and understanding of the manufacturing process allows Matteo Gerbi Limited to engage with the business needs of others, and to place ideas within the larger context of the process needed to make them a reality. Matteo Gerbi Limited's work has already been acknowledged by several national and international media outlets for its exciting, superior and cutting edge design and quality.

## Previous Clientele

Please kindly get in touch for more information.

## Awards and Accolades

Matteo Gerbi was born in Italy, where he studied architecture in Florence and worked in a small architectural practice for 3 years, followed by a year in a practice in Ireland. On moving to London (UK) he worked for 4 years in a large architectural practice in the aviation field as Lead Architect for projects at Gatwick and Heathrow Airports. More recently, Matteo set up his own company, Matteo Gerbi Limited, and started to focus on product design projects, as well as laying the foundations for his own architectural practice. After exhibiting at London's renowned 100% Design show earlier this year, several European companies expressed great interest in his designs, and Matteo Gerbi Limited is currently in conversation with these entities about agreements regarding the production of new products.
