Professional Experience and Curriculum Vitae

Self taught Jose Alfredo Trevino embarks with his intent as a healing tool for his personal trauma, his contribution attempts to rearrange a shift in energy through perception. It is through this medium that Jose facilitates his multiverse.

He shares his perspective on life, mystery and awareness with only one expectation: to provoke the viewer. Art is created as the viewer perceives. Only then, genuine communication occurs.

All surfaces are recycled materials discarded from shops, print shops and frame shops. Giving this discarded material a second opportunity is a reaffirmation that life gives us more than one path. Jose wants to believe all survivors are proof of this conviction.
