## Professional Experience and Curriculum Vitae

With an education in philosophy and self-taught in photography, and time lapse film making. I combine any photographic technique with my philosophy background to ask questions, respond to my surroundings and tell stories through my photographs.

I find myself drawn to the minute detail of everyday objects. Simple things ignored by the human eye, can give a very deep emotional feeling through photography. It is my journey to find the ultimate, in my art photography. This journey is finally bringing me back to basics, like asking WHO AM I, just like philosophy.
