Professional Experience and Curriculum Vitae

Declinations of images

Here is the meaning and concept of Monica Mazzanti's artworks. The photographic shots are the starting point for images that transform themselves into graphic signs transmitting emotions. The results are decorative design items where the photographic image is their peculiar characteristic. Colors and imagination offer a large range of interpretation. Special attention is given to the materials to be printed which go from baked clay to canvas, from aluminum to wood, from glass to plexiglas in a never ending search for new solutions and innovative finishing techniques.
