SKILLS

Artist specializes in mainly painting and drawing.
Other specialties include photography, jewelry, and graphic design.

ARTIST'S STATEMENT/BIOGRAPHY:

This artist has been involved in art since she was five years old. She has worked with every medium including jewelry. When she was a senior in college she had a teacher, Lee Johnson. Her art professor taught her how to work with oils. Ever since then she prefers to paint with oils because, "They are much more vibrant than any other medium I have ever worked with!" When this contemporary artist thought about a new painting, she is usually filled with a lot of energy and can usually create a painting in about one
