Professional Experience and Curriculum Vitae

I am a freelance motion graphics designer and illustrator operating from New York City. I work primarily in After Effects, Photoshop and Illustrator.

The bulk of my experience lies in the ten years I spent in film. Seven of those years where in Los Angeles where I worked in the special effects industry as a sculptor and creature designer. The transition from working in pre-production with clay and marker to the digitally dominated realm of post-production has given me a unique perspective. This collective knowledge serves as a vehicle for my creative process.
