**Homeschooling has grown *dramatically* since 1993, when it finally became legal in ALL 50 states.**

Today, parents seeking educational options face a new challenge.

Amidst the tumult of voices debating methods and philosophies of education, it can be difficult to get past the assumption, "I could *never* homeschool." Parents need a space so they can hear encouraging voices saying, "You can homeschool."

Homeschool Now USA exists to give those voices a megaphone. Help us make that megaphone as cogent and powerful as possible by joining us.

If you believe that more people would homeschool if they just knew how to get started, [join us in hosting an event this January](#). We will provide the training and the resources so you can effectively reach these parents who earnestly want to know their educational options.

**The goal is to double homeschooling's numbers within a few short years— "Operation 5M." Will you help us?**
