Professional Experience and Curriculum Vitae

I am a freelance artist based in Sheffield, South Yorkshire. Primarily a professional vocalist, this was my innovation to begin creating art - needing a second creative string to my bow! I design music media which has helped develop my art skills over the last four years whilst developing my art portfolio. My clients have mainly been musicians, but having built a good reputation as a local artist, I have undertaken work for Rotherham Arts, designing logos and posters for various annual events. I exhibit a modest selection of my work at a local art gallery and sell and showcase my art via my online portfolio.

My medium is digital art - working with my own photography and pencil sketch combined to produce my artwork.
