Professional Experience and Curriculum Vitae

Dane's work has been the subject of numerous group and one man shows throughout Australia. His vision is at once humorous and tragic; his photos like soft punctuation marks - an exclamation that is quiet and yet not without a tension. In The Road there's the closeness, the fact of a steering wheel, or the cosy interior of a car eerily framing a misty countryside. There is always a layer of isolation, of absence, that makes Beesley's work contemporary and ethereal. Continually honing his craft, he is known for an ability to cut to the raw essence of his subject.
