Professional Experience and Curriculum Vitae

Sameer Kulavoor started working when he was just 16yrs of age.

(Yeah, its unnatural in India to work so young). Without any particular background in graphic design, his liking for art led him to exploring different mediums. After graduating from Sir. J. J. Institute of Applied Arts and topping the Mumbai University, he chose to freelance. The tempting offers from the best of advertising, design and animation houses in India couldn't budge him from pursuing what he believed in.

At 22yrs of age, he has worked internationally in areas like illustration and design for editorial and advertising; motion graphics and animation for web, television and cinema. He has created two Music videos, a few shorts and hundreds of illustrative designs for a vast and varied portfolio of clients, from MNCs to Music Bands.

He has recieved several awards across categories over the years.

Sameer is currently planning an exhibition of his travel sketches + digital works and looking forward to work internationally.
