Professional Experience and Curriculum Vitae

I am currently seeking contracts or full time employment that will both challenge me to learn new things while utilizing my existing skills.

My specialty and years of experience lie in professional web development, content development SEO , and graphic design. I have extensive experience with both Wordpress and Joomla CMS solutions, and I am currently learning Ruby and other CMS applications available.

I have also had quite a bit of experience with print design, consisting of business documents, promotional and yellow page directories and keep a keen knack and enjoyment for developing marketing and promotional solutions that appeal both to the consumer and business owners I work with.

My ability to contribute to your project's success is limited only by the opportunity to participate.
