Professional Experience and Curriculum Vitae

I have always been inspired by fantastic and imaginative stories with dark themes. In addition to my love of fantasy, I grew up with a close relationship to (and love for) animals. These ideas and inspirations naturally made their way into my own work while I progressed as an artist.

My work would be best described as imaginative realism or dark fantasy art. I frequently include animals, death, skeletons, crows and other dark subject matter in my artwork, and I love to incorporate hidden references to personal experiences and stories within each piece.

As an artist, I try to breathe life into each piece by incorporating both subtle and bold movements. My hope is that the observer not only views the artwork, but also imagines the rushing wind, senses the cold, or hears the sound of wings thrashing in the sky. I aim for each and every piece to be a complete visual experience.
