## Professional Experience and Curriculum Vitae

I am a creative, enterprising and versatile individual with a wide range of transferable skills. My specialities are designing and forcing constant improvement by continuously (and usually on my own initiative) analysing given circumstances, identifying problems and working out best possible solutions to them.

As a proofreader, I bring a keen eye for detail; as a philologist - analytical thinking, diligence and tenacity; as a teacher - positive attitude and endless patience; as a designer - innovation and creativeness; and as a writer - unbridled passion for work.

Looking to secure a position in Digital Media, where I can bring and utilise my energy, imagination and talents, while developing current skill set further.
