## Professional Experience and Curriculum Vitae

What is distinct about SKP (Steven Kovich Photography) is a diverse body of work and experience gathered from over 20 years of professional shooting. SKP has a portfolio ranging from professional sports action and portraits to advertising shoots at remote locations. SKP is experienced in producing and shooting very large productions and has accumulated some of the best crew members in the business in cities all around the USA. In addition to shooting on location, SKP has a state of the art photo studio located in downtown St. Petersburg where he regularly shoots food, product and fashion. In these times of digital photography, many people call themselves a professional photographer. When high end photography and reliability is what a client requires, Steven Kovich stands apart from the pack. He works hard and long to give his clients a one hundred percent effort at all times. The ability to solve visual problems is essential and has little to do with getting a picture that's in focus. In the past 20 plus years the odds are he's encountered and solved the problems that might be encountered on your shoot. Being competitive and creative is essential in the success of any business and SKP thrives on the challenge to produce the very best possible imagery for the very best value.
