Professional Experience and Curriculum Vitae

Mark Peterman explores narratives through photographs and multimedia. Although his work is at home in the post-modern world it is very informed by history. A desire to be creative on a daily basis fuels his curiosity about the human experience and he documents things in sketchbooks as a way of remembering his life.

Since he was young, he has been recreating the world around him through photographs and is continually refining his artistic vision by drawing on influences from music, literature and art. Mark's work reflects a graphic, story-telling quality with a cinematic feel, drawing on his design background while studying at the Kansas City Art Institute.

Mark enjoys photographing ordinary people who do interesting things. Although he is primarily a still photographer, he has recently started incorporating multi-media and motion into his work. Recent project themes include examining how ones memory is effected with the passage of time and exploring family histories.
