Professional Experience and Curriculum Vitae

I am an artist and designer living and working in the north of Ireland.

As a designer I translate and communicate the ideas and projects of my clients into the visual language they need to communicate with their audience. It is a privilege to use my skills in this way.

I see colour and shape in the most mundane of places – as an artist my imagination is constantly drawing vibrant moving images on blank surfaces from the building blocks garnered from the swirl of milk in a teacup or the flight path of an insect around a window or the shape of clouds in the sky.

These waking dreams become paintings and drawings, tapestries and enamels, pyrography, textiles and painted ceramics. The artist explores fundamentals and feelings, the beauty in natural form, and the ability we have to find solace and meaning in the simplest hints of shapes and colour.
